PART II
COURSES OF STUDIES

हिंदी मातृभाषा कक्षा IX-X

नवीं कक्षा में दाखिल होने वाले विद्यार्थी की भाषा शैली और विचार बोध का ऐसा आधार बन चुका होता है कि उसे उसके भाषिक दायरे के विस्तार और वैचारिक समृद्धि के लिए ज़रूरी संसाधन मुहैया कराए जाएँ। माध्यमिक स्तर तक आते-आते विद्यार्थी किशोर हो गया होता है और उसमें बोलने, पढ़ने, लिखने के साथ-साथ आलोचनात्मक दृष्टि विकसित होने लगती है। भाषा के सौंदर्यात्मक पक्ष, कथात्मकता / गीतात्मकता, अखबारी समझ, शब्द की दूसरी शक्तियों के बीच अंतर, राजनैतिक चेतना, सामाजिक चेतना का विकास, उसमें बच्चे की अपनी अस्मिता का संदर्भ और आवश्यकता के अनुसार उपयुक्त भाषा-प्रयोग, शब्दों के सुचिंतित इस्तेमाल, भाषा की नियमबद्ध प्रकृति आदि से विद्यार्थी परिचित हो जाता है। इतना ही नहीं वह विभिन्न विधाओं और अभिव्यक्ति की अनेक शैलियों से भी वाकिफ़ होता है। अब विद्यार्थी की पढ़ाई आस-पड़ोस, राज्य-देश की सीमा को लाँघते हुए वैश्विक क्षितिज तक फैल जाती है। इन बच्चों की दुनिया में समाचार, खेल, फ़िल्म तथा अन्य कलाओं के साथ-साथ पत्र-पत्रिकाएँ और अलग-अलग तरह की किताबें भी प्रवेश पा चुकी हैं।

इस स्तर पर मातृभाषा हिंदी का अध्ययन साहित्यिक, सांस्कृतिक और व्यावहारिक भाषा के रूप में कुछ इस तरह से हो कि उच्चतर माध्यमिक स्तर तक पहुँचते-पहुँचते यह विद्यार्थियों की पहचान, आत्मविश्वास और विमर्श की भाषा बन सके। प्रयास यह भी होगा कि विद्यार्थी भाषा के लिखित प्रयोग के साथ-साथ सहज और स्वाभाविक मौखिक अभिव्यक्ति में भी सक्षम हो सके।

इस पाठ्यक्रम के अध्ययन से

- (क) विद्यार्थी अगले स्तरों पर अपनी रुचि और आवश्यकता के अनुरूप हिंदी की पढ़ाई कर सकेंगे तथा हिंदी में बोलने और लिखने में सक्षम हो सकेंगे।
- (ख) अपनी भाषा दक्षता के चलते उच्चतर माध्यमिक स्तर पर विज्ञान, समाज विज्ञान और अन्य पाठ्यक्रमों के साथ सहज संबद्धता (अंतर्संबंध) स्थापित कर सकेंगे।
- (ग) दैनिक व्यवहार, आवेदन-पत्र लिखने, अलग-अलग किस्म के पत्र लिखने, तार (टेलिग्राम) लिखने, प्राथमिकी दर्ज़ कराने इत्यादि में सक्षम हो सकेंगे।
- (घ) उच्चतर माध्यमिक स्तर पर पहुँचकर विभिन्न प्रयुक्तियों की भाषा के द्वारा उनमें वर्तमान अंतरसंबंध को समझ सकेंगे।
- (ङ) हिंदी में दक्षता को वे अन्य भाषा-संरचनाओं की समझ विकसित करने के लिए इस्तेमाल कर सकेंगे, स्थानांतरित कर सकेंगे।

कक्षा IX-X मातृभाषा के रूप में हिंदी-शिक्षण के उद्देश्य :

- कक्षा आठ तक अर्जित भाषिक कौशलों (सुनना, बोलना, पढ़ना, लिखना और चिंतन) का उत्तरोत्तर विकास।
- सृजनात्मक साहित्य के आलोचनात्मक आस्वाद की क्षमता का विकास।
- स्वतंत्र और मौखिक रूप से अपने विचारों की अभिव्यक्ति का विकास।
- ज्ञान के विभिन्न अनुशासनों के विमर्श की भाषा के रूप में हिंदी की विशिष्ट प्रकृति एवं क्षमता का बोध कराना।

- साहित्य की प्रभावकारी क्षमता का उपयोग करते हुए सभी प्रकार की विविधताओं (राष्ट्रीयताओं, धर्म, लिंग, भाषा) के प्रति सकारात्मक और संवेदनशील रवैये का विकास।
- जाति, धर्म, लिंग, राष्ट्रीयताओं, क्षेत्र आदि से संबंधित पूर्वाग्रहों के चलते बनी रूढ़ियों की भाषिक अभिव्यक्तियों के प्रति सजगता।
- विदेशी भाषाओं समेत गैर हिंदी भाषाओं की संस्कृति की विविधता से परिचय।
- व्यावहारिक और दैनिक जीवन में विविध किस्म की अभिव्यक्तियों की मौखिक व लिखित क्षमता का विकास।
- संचार माध्यमों (प्रिंट और इलेक्ट्रॉनिक) में प्रयुक्त हिंदी की प्रकृति से अवगत कराना और नए-नए तरीके से प्रयोग करने की क्षमता से परिचय।
- सघन विश्लेषण, स्वतंत्र अभिव्यक्ति और तर्क क्षमता का विकास।
- अमूर्तन की पूर्व अर्जित क्षमताओं का उत्तरोत्तर विकास।
- भाषा में मौजूद हिंसा की संरचनाओं की समझ का विकास।
- मतभेद, विरोध और टकराव की परिस्थितियों में भी भाषा के संवेदनशील और तर्कपूर्ण इस्तेमाल से शांतिपूर्ण संवाद की क्षमता का विकास।
- भाषा की समावेशी और बहुभाषिक प्रकृति के प्रति ऐतिहासिक नज़रिए का विकास।
- शारीरिक और अन्य सभी प्रकार की चुनौतियों का सामना कर रहे बच्चों में भाषिक क्षमताओं के विकास की उनकी अपनी विशिष्ट गति और प्रतिभा की पहचान।

शिक्षण युक्तियाँ

माध्यमिक कक्षाओं में अध्यापक की भूमिका उचित वातावरण के निर्माण में सहायक की होनी चाहिए। भाषा और साहित्य की पढ़ाई में इस बात पर ध्यान देने की ज़रूरत होगी कि

- विद्यार्थी द्वारा की जा रही गलतियों को भाषा के विकास के अनिवार्य चरण के रूप में स्वीकार किया जाना चाहिए जिससे विद्यार्थी अबाध रूप से बिना झिझक लिखित और मौखिक अभिव्यक्ति करने में उत्साह का अनुभव करे। विद्यार्थियों पर शुद्धि का ऐसा दबाव नहीं होना चाहिए कि वे तनावग्रस्त माहौल में पड़ जाएँ। उन्हें भाषा के सहज, कारगर और रचनात्मक रूपों से इस तरह परिचित कराना उचित है कि वे स्वयं सहजरूप से भाषा का सृजन कर सकें।
- गलत से सही दिशा की ओर पहुँचने का प्रयास हो। विद्यार्थी स्वतंत्र और अबाध रूप से लिखित और मौखिक अभिव्यक्ति करे। अगर कहीं भूल होती है तो अध्यापक को अपनी अध्यापन-शैली में परिवर्तन की आवश्यकता होगी।
- ऐसे शिक्षण-बिंदुओं की पहचान की जाए जिससे कक्षा में विद्यार्थी निरंतर सक्रिय भागीदारी करे और अध्यापक भी इस प्रक्रिया में उनका साथी बने।
- हर भाषा का अपना एक नियम और व्याकरण होता है। भाषा की इस प्रकृति की पहचान कराने में परिवेशगत और पाठगत संदर्भों का ही प्रयोग करना चाहिए। यह पूरी प्रक्रिया ऐसी होनी चाहिए कि विद्यार्थी स्वयं को शोधकर्ता समझे तथा अध्यापक इसमें केवल निर्देशन करें।

- हिंदी में क्षेत्रीय प्रयोगों, अन्य भाषाओं के प्रयोगों के उदाहरण से यह बात स्पष्ट की जा सकती है कि भाषा अलगाव में नहीं बनती और उसका परिवेश अनिवार्य रूप से बहुभाषिक होता है।
- शारीरिक बाधाग्रस्त विद्यार्थियों के लिए उपयुक्त शिक्षण-सामग्री का इस्तेमाल किया जाए तथा किसी भी प्रकार से उन्हें अन्य विद्यार्थियों से कमतर या अलग न समझा जाए।
- कक्षा में अध्यापक को हर प्रकार की विभिन्नताओं (लिंग, जाति, वर्ग, धर्म) के प्रति सकारात्मक और संवेदनशील वातावरण निर्मित करना चाहिए।
- परंपरा से चले आ रहे मुहावरों, कहावतों (जैसे, रानी रूटेंगी तो अपना सुहाग लेंगी) आदि के ज़रिए विभिन्न प्रकार के पूर्वाग्रहों की समझ पैदा करनी चाहिए और उनके प्रयोग के प्रति आलोचनात्मक दृष्टि विकसित करनी चाहिए।
- मध्य कालीन काव्य की भाषा के मर्म से विद्यार्थी का परिचय कराने के लिए ज़रूरी होगा कि किताबों में आए काव्यांशों की संगीतबद्ध प्रस्तुतियों के ऑडियो-वीडियो कैंसेट तैयार किए जाएँ। अगर आसानी से कोई गायक/गायिका मिले तो कक्षा में मध्यकालीन साहित्य के अध्यापन-शिक्षण में उससे मदद ली जानी चाहिए।
- वृत्तचित्रों और फीचर फिल्मों को शिक्षण-सामग्री के तौर पर इस्तेमाल करने की ज़रूरत है। इनके प्रदर्शन के क्रम में इन पर लगातार बातचीत के ज़रिए सिनेमा के माध्यम से भाषा के प्रयोग की विशिष्टता की पहचान कराई जा सकती है और हिंदी की अलग-अलग छटा दिखाई जा सकती है।
- कक्षा में सिर्फ एक पाठ्यपुस्तक की भौतिक उपस्थिति से बेहतर यह है शिक्षक के हाथ में तरह-तरह की पाठ्यसामग्री को विद्यार्थी देख सकें और शिक्षक उनका कक्षा में अलग-अलग मौकों पर इस्तेमाल कर सकें।
- भाषा लगातार ग्रहण करने की क्रिया में बनती है, इसे प्रदर्शित करने का एक तरीका यह भी है कि शिक्षक खुद यह सिखा सकें कि वे भी शब्दकोश, साहित्यकोश, संदर्भग्रंथ की लगातार मदद ले रहे हैं। इससे विद्यार्थियों में इनके इस्तेमाल करने को लेकर तत्परता बढ़ेगी। अनुमान के आधार पर निकटतम अर्थ तक पहुँचकर संतुष्ट होनेकी जगह वे अधिकतम अर्थ की खोज करने का अर्थ समझ जाएँगे। इससे शब्दों की अलग-अलग रंगत का पता चलेगा, वे शब्दों के बारीक अंतर के प्रति और सजग हो पाएँगे।

व्याकरण बिंदु

विद्यार्थियों को मातृभाषा के संदर्भ में व्याकरण के विभिन्न पक्षों का परिचय कक्षा 3 से ही मिलने लगता है। हिंदी भाषा में इन पक्षों और हिंदी की अपनी भाषागत विशिष्टताओं की चर्चा पाठ्यपुस्तक और अन्य शिक्षण-सामग्री के समृद्ध संदर्भ में की जानी चाहिए। नीचे कक्षा 6 व 10के लिए कुछ व्याकरणिक बिंदु दिए गए हैं जिन्हें कक्षा या विभिन्न चरणों के क्रम में नहीं रखा गया है।

संरचना और अर्थ के स्तर पर भाषा की विशिष्टताओं की परिधि इन व्याकरणिक बिंदुओं से कहीं अधिक विस्तृत है। वे बिंदु इन विशिष्टताओं का संकेत भर हैं जिनकी चर्चा पाठ के सहज संदर्भ में और बच्चों के आसपास उपलब्ध भाषायी परिवेश को ध्यान में रखते हुए की जानी चाहिए।

कौशलों के अंतरण का मूल्यांकन के लिए मापक्रम

द्वितीय भाषा के रूप में हिंदी

कक्षा IX-X

भारत एक बहुभाषी देश है जिसमें बहुत-सी क्षेत्रीय भाषाएँ रची-बसी हैं। भाषिक और सांस्कृतिक दृष्टि से भिन्न होनेके बावजूद भारतीय परंपरा में बहुत कुछ ऐसा है जो एक दूसरे को जोड़ता है। यही कारण है कि मातृभाषा के रूप में अलग भाषा को पढ़ने वाला विद्यार्थी जब दूसरी भाषा के रूप में हिंदी का चुनाव करता है तो उसके पास अभिव्यक्ति का एक दृढ़ आधार पहली भाषा के रूप में पहले से ही मौजूद होता है। इसीलिए छठी से आठवीं कक्षा में सीखी हुई हिंदी का विकास भी वह तेज़ी से करने लगता है। आठवीं कक्षा तक वह हिंदी भाषा में सुनने, पढ़ने, लिखने और कुछ-कुछ बोलने का अभ्यास कर चुका होता है। हिंदी की बाल पत्रिकाएँ और छिटपुट रचनाएँ पढ़ना भी अब उसे आ गया है। इसीलिए जब वह नवीं, दसवीं कक्षा में हिंदी पढ़ेगा तो जहाँ एक ओर हिंदी भाषा के माध्यम से सारे देश से जुड़ेगा वहीं दूसरी ओर अपने क्षेत्र और परिवेश को हिंदी भाषा के माध्यम से जानने की कोशिश भी करेगा क्योंकि किशोर वय के इन बच्चों के मानसिक धरातल का विकास विश्व-स्तर तक पहुँच चुका होता है।

शिक्षण उद्देश्य

- दैनिक जीवन में हिंदी में समझने-बोलने के साथ-साथ लिखने की क्षमता का विकास करना।
- हिंदी के किशोर-साहित्य, अखबार व पत्रिकाओं को पढ़कर समझ पाना और उसका आनंद उठाने की क्षमता का विकास करना।
- औपचारिक विषयों और संदर्भों में बातचीत में भाग ले पाने की क्षमता का विकास करना।
- हिंदी के ज़रिये अपने अनुभव संसार को लिखकर सहज अभिव्यक्ति कर पाने में सक्षम बनाना।
- संचार के विभिन्न माध्यमों (प्रिंट और इलेक्ट्रॉनिक) में प्रयुक्त हिंदी के विभिन्न रूपों को समझने की योग्यता का विकास करना।
- कक्षा में बहुभाषिक, बहुसांस्कृतिक संदर्भों के प्रति संवेदनशील सकारात्मक सोच बनाना।
- अपनी मातृभाषा और परिवेशगत भाषा को साथ रखकर हिंदी की संरचनाओं की समझ बनाना।

शिक्षण युक्तियाँ :

- द्वितीय भाषा के रूप में पढ़ाई जा रही हिंदी भाषा का स्तर पढ़ने और पढ़ाने दोनों ही दृष्टियों से मातृभाषा सीखने की तुलना में कुछ मंथर गति से चलेगा। यह गति धीरे-धीरे बढ़ सके, इसके लिए हिंदी अध्यापकों को बड़े धीरज से अपने अध्यापन कार्यक्रमों को नियोजित करना होगा। किसी भी द्वितीय भाषा में निपुणता प्राप्त करने-कराने का एक ही उपाय है- उस भाषा का लगातार रोचक अभ्यास करना-कराना। ये अभ्यास जितने अधिक रोचक, सक्रिय एवं प्रासंगिक होंगे विद्यार्थियों की भाषिक उपलब्धि भी उतनी ही तेज़ी से हो सकेगी। मुखर भाषिक अभ्यास के लिए वार्तालाप, रोचक कहानी सुनना-सुनाना, घटना वर्णन, चित्र-वर्णन, संवाद, वाद-विवाद, अभिनय, भाषण प्रतियोगिताएँ, कविता पाठ और अंत्याक्षरी जैसी गतिविधियों का सहारा लिया जा सकता है।

- मध्यकालीन काव्य की भाषा के मर्म से विद्यार्थी का परिचय कराने के लिए ज़रूरी होगा कि किताबों में आए काव्यांशों की संगीतबद्ध प्रस्तुतियों के ऑडियो-वीडियो कैंसेट तैयार किए जाएँ। अगर आसानी से कोई गायक/गायिका मिले तो कक्षा में मध्यकालीन साहित्य के अध्यापन-शिक्षण में उससे मदद ली जानी चाहिए।
- वृत्तचित्रों और फ़ीचर फ़िल्मों को शिक्षण-सामग्री के तौर पर इस्तेमाल करने की ज़रूरत है। इनके प्रदर्शन के क्रम में इन पर लगातार बातचीत के ज़रिए सिनेमा के माध्यम से भाषा के प्रयोग की विशिष्टता की पहचान कराई जा सकती है और हिंदी की अलग-अलग छटा दिखाई जा सकती है।
- कक्षा में सिर्फ एक पाठ्यपुस्तक की भौतिक उपस्थिति से बेहतर यह है शिक्षक के हाथ में तरह-तरह की पाठ्यसामग्री को विद्यार्थी देख सकें और शिक्षक उनका कक्षा में अलग-अलग मौकों पर इस्तेमाल कर सकें।
- भाषा लगातार ग्रहण करने की क्रिया में बनती है, इसे प्रदर्शित करने का एक तरीका यह भी है कि शिक्षक खुद यह सिखा सकें कि वे भी शब्दकोश, साहित्यकोश, संदर्भग्रंथ की लगातार मदद ले रहे हैं। इससे विद्यार्थियों में इनके इस्तेमाल करने को लेकर तत्परता बढ़ेगी। अनुमान के आधार पर निकटतम अर्थ तक पहुँचकर संतुष्ट होने की जगह वे अधिकतम अर्थ की खोज करने का अर्थ समझ जाएँगे। इससे शब्दों की अलग-अलग रंगत का पता चलेगा और उनमें संवेदनशीलता भी बढ़ेगी। वे शब्दों के बारीक अंतर के प्रति और सजग हो जाएँगे।

Teachers may kindly keep the following in mind to develop these competencies:

- Creativity** : Students should be encouraged to think on their own and express their ideas using their experience, knowledge and imagination, rather than being text or teacher dependent.
- Self-monitoring** : Students should be encouraged to monitor their progress, space out their learning, so students should be encouraged to see language not just as a functional tool, but as an important part of personal development and inculcation of values.

Assessment in class IX and X

The English curriculum aims at the harmonious development of the four language skills, and thus of the learners' communicative capacity. Teaching/testing objectives have been set for each of these skills, indicating the level of achievement expected of the learners. However, although it is possible to assess these skills and sub-skills, it is not possible to test all of them through a formal, time-bound examination. It is, therefore, essential to measure the level of attainment in these skills through Formative assessment, in addition to the Summative assessment. The overall pattern of the two modes of assessment at Class IX and X is as follows:

The academic year will be divided into two assessment periods:

Summative I- from April - September - 20 % weightage

Formative I - 10 %

Formative II- 10%

Summative II - from October - March 40 % weightage

Formative III - 10%

Formative IV- 10%

Formative Assessment is a tool used by the teacher to continuously monitor student progress in a non-threatening, supportive environment. It involves regular descriptive feedback, a chance for the student to reflect on the performance, take advice and improve upon it. It involves students being an essential part of assessment from designing criteria to assessing self or peers. If used effectively it can improve student performance tremendously while raising the self esteem of the child and reducing the work load of the teacher.

Features of Formative Assessment

- is diagnostic and remedial
- makes the provision for effective feedback
- provides the platform for the active involvement of students in their own learning.
- enables teachers to adjust teaching to take account of the results of assessment
- recognizes the profound influence assessment has on the motivation and self-esteem of students, both of which are crucial influences on learning
- recognizes the need for students to be able to assess themselves and understand how to improve
- builds on students' prior knowledge and experience in designing what is taught.
- incorporates varied learning styles into deciding how and what to teach.
- encourages students to understand the criteria that will be used to judge their work
- offers an opportunity to students to improve their work after feedback,
- helps students to support their peers, and expect to be supported by them.

Formative Assessment is thus carried out during a course of instruction for providing continuous feedback to both the teachers and the learners for taking decisions regarding appropriate modifications in the transactional procedures and learning activities.

Continuous assessment refers to the assessment of student's achievement throughout the year, through a variety of activities field trips and visits outside the schools are also carried out within the school. Such activities may be formal or informal, but in order to assess listening and speaking skills, it is important that a large proportion of the marks allotted should be derived from informal procedures.

Conversation skills (Listening and Speaking)-Assessment in this area relates to the teaching/testing objectives for these two skills. In the skill-based approach to language learning, the importance of conversation skills cannot be underestimated.

At the end of each term, the teacher should be able to assess the level of each student's conversation skills, based on observation of their participation in the English classes. Whenever in the coursework the students are required to discuss role play, simulate, express a point of view etc., the teacher should monitor the activities and critically observe each student's participation. It is important to stress that informal assessment for conversation skills should be a regular, ongoing activity throughout the term. A Conversation Skill Assessment Scale is given below. For each skill, students may be awarded marks from 0 to 10, but specifications are given only for bands 1,3,5,7 and 9. Using this scale, a teacher can place a student at a particular band; for example, a student falling between bands 3 and 5 would be awarded 4 marks, and particularly deserving students could be awarded 10 marks. Students should be informed at the beginning of the year that their class participation will be assessed in this way.

Conversation Skills Assessment Scale

Listening	Speaking
<p>The Learner</p> <ol style="list-style-type: none"> 1. shows general ability to understand words and phrases in a familiar context but cannot follow connected speech; 3 has ability to follow short connected utterances in a familiar context; 5 has ability to understand explicitly stated information in both familiar and unfamiliar contexts; 7 understands a range of longer spoken texts with reasonable accuracy, and is able to draw inferences; 9 shows ability to interpret complex discourse in terms of points of view; adapts listening strategies to suit different purposes 	<p>The Learner</p> <ol style="list-style-type: none"> 1 shows ability to use only isolated words and phrases but cannot operate at connected speech level; 3 in familiar situation, uses only short connected utterances with limited accuracy; 5 shows ability to use more complex utterances with some fluency in longer discourse; still makes some errors which impede communication; 7 organises and presents thoughts in a reasonably logical and fluent manner in unfamiliar situations; makes errors which do not interfere with communication; 9 can spontaneously adopt style, appropriate to purpose and audience; makes only negligible errors.

The overall assessment policy for Class IX seeks to measure the four skills. Speaking has been covered under conversation skills, and is clearly not assessable through a written assignment. Listening and reading, however, can be assessed in this way, through activities which lead to a written product such as notes, a table or a summary. This type of assessment however should not be a test of writing skills. Students should be awarded marks as objectively as possible according to the extent to which they have understood, whether through reading or through listening. They should not be penalised in such assignments for errors in punctuation, spelling or grammar?

Other assignments, however, will focus on writing skills and involve extended writing. This takes place through writing skills activities in the Main Course Book, and via certain activities in the Literature Reader. Assessment of written work forms an important and integral part of the overall assessment of the student's ability in the use of the English language. It is in this area very often that subjectivity creeps in and mars the judgment in evaluation because of a lack of clear-cut guidelines for the teachers.

In the new curriculum for English, each student's written work has to be assessed throughout the year in an informal manner. For this, it becomes essential to provide a rating scale to help teachers to make formative assessment objective and uniform. The assignments should vary each year. Throughout the year, the teacher should keep a record of marks awarded for assignments and activities carried out as part of formative assessment.

Reading Project

Inculcating good reading habits in children has always been a concern for all stakeholders in education. The purpose is to create independent thinking individuals with the ability to not only create their own knowledge but also critically interpret, analyse and evaluate it with objectivity and fairness. This will also help students in learning and acquiring better language skills.

Creating learners for the 21st century involves making them independent learners who can 'learn, unlearn and relearn' and if our children are in the habit of reading they will learn to reinvent themselves and deal with the many challenges that lie ahead of them.

Reading is not merely decoding information or pronouncing words correctly, it is an interactive dialogue between the author and the reader in which the reader and author share their experiences and knowledge with each other which helps them to understand the text and impart meaning to the text other than what the author himself may have implied. Good readers are critical readers with an ability to arrive at a deeper understanding of not only the world presented in the book but also of the real world around them. They not only recall what they read but comprehend it too. Their critical reading and understanding of the text helps them create new understanding, solve problems, infer and make connections to other texts and experiences. Reading does not mean reading for leisure only but also for information, analysis and synthesis of knowledge. The child may be encouraged to read on topics as diverse as science and technology, politics and history. This will improve his/her critical thinking skills and also help in improving his/her concentration.

Reading any text should be done with the purpose of:-

1. reading silently at varying speeds depending on the purpose of reading;
2. adopting different strategies for different types of texts, both literary and non-literary;
3. recognising the organisation of a text;
4. identifying the main points of a text;
5. understanding relations between different parts of a text through lexical and grammatical cohesion devices;
6. anticipating and predicting what will come next.;
7. deducing the meaning of unfamiliar lexical items in a given context;
8. consulting a dictionary to obtain information on the meaning and use of lexical items;
9. analysing, interpreting, inferring (and evaluating) the ideas in the text;
10. selecting and extracting from text information required for a specific purpose;
11. retrieving and synthesising information from a range of reference material using study skills such as skimming and scanning;
12. interpreting texts by relating them to other material on the same theme (and to their own experience and knowledge); and
13. reading extensively on their own for pleasure;

A good reader is most often an independent learner and consequently an independent thinker capable of taking his/her own decisions in life rationally. Such a learner will most assuredly also be capable of critical thinking.

Reading a book should lead to creative and individual response to the author's ideas presented in the book in the form of:-

- short review
- dramatisation of the story
- commentary on the characters
- critical evaluation of the plot, story line and characters
- comparing and contrasting the characters within the story and with other characters in stories by the same author or by the other authors
- extrapolating about the story's ending or life of characters after the story ends
- defending characters' actions in the story.
- making an audio story out of the novel/text to be read out to younger children.
- Interacting with the author
- Holding a literature fest where various characters interact with each other
- Acting like authors/poets/dramatists, to defend their works and characters.
- Symposiums and seminars for introducing a book, an author, or a theme
- Finding similar text in other languages, native or otherwise and looking at differences and similarities.
- Creating graphic novels out of novels/short stories read
- Dramatising incidents from a novel or a story
- Creating their own stories

1. A Reading Project of 10 marks has been introduced in class IX & X.
2. Schools may use books of their own choice.
3. Schools can vary the level but at least one book per term is to be read by every child.

Teachers may opt for:-

- One book;
- Books by one author; or
- Books of one genre; to be read by the whole class.

Teacher may select books suitable to the age and level of the learners. Care ought to be taken to choose books that are appropriate in terms of language, theme and content and which do not hurt the sensibilities of any child.

Teachers may later suggest books from other languages but dealing with the same themes as an extended activity.

The Project should lead to independent learning/ reading skills and hence the chosen book/selection should not be taught in class, but may be introduced through activities and be left for the students to read at their own pace. Teachers may, however, choose to assess a child's progress or success in reading the book by asking for verbal or written progress reports, looking at the diary entries of students, engaging in a discussion about the book, giving a short quiz or a worksheet about the book/ short story. The mode of intermittent assessment may be decided by the teacher as she/ he sees fit.

These may be used for Formative Assessment (F1, F2, F3 and F4) only. Various modes of assessment such as conducting Reviews, Discussions, Open Houses, Exchanges, Interact with the Author, writing scripts for plays can be considered.

ENGLISH - LANGUAGE AND LITERATURE

Code No. 184

CLASSES IX-X

Background

Traditionally, language-learning materials beyond the initial stages have been sourced from literature: prose, fiction and poetry. While there is a trend for inclusion of a wider range of contemporary and authentic texts, accessible and culturally appropriate pieces of literature should play a pivotal role at the secondary stage of education. The English class should not be seen as a place merely to read poems and stories in, but an area of activities to develop the learner's imagination as a major aim of language study, and to equip the learner with communicative skills to perform various language functions through speech and writing.

Objectives

The general objectives at this stage are:

- to build greater confidence and proficiency in oral and written communication
- to develop the ability and knowledge required in order to engage in independent reflection and inquiry
- to use appropriate English to communicate in various social settings
- equip learners with essential language skills to question and to articulate their point of view.
- to build competence in the different registers of English
- to develop sensitivity to, and appreciation of, other varieties of English, Indian English, and the culture they reflect
- to enable the learner to access knowledge and information through reference skills (consulting a dictionary / thesaurus, library, internet etc.)
- to develop curiosity and creativity through extensive reading
- to facilitate self-learning to enable them to become independent learners
- to review, organise and edit their own work and work done by peers

At the end of this stage learners will be able to do the following:

- give a brief oral description of events / incidents of topical interest
- retell the contents of authentic audio texts (weather reports, public announcements, simple advertisements, short interviews, etc.)
- participate in conversations, discussions, etc. on topics of mutual interest in non-classroom situations

- narrate the story depicted pictorially or in any other non-verbal mode
- respond in writing to business letters, official communications
- read and identify the main points / significant details of texts like scripts of audio-video interviews, discussions, debates etc.
- write without prior preparation on a given topic and be able to defend or explain the position taken / views expressed in the form of article, speech, or a debate.
- write a summary of short lectures on familiar topics by making / taking notes
- write an assessment of different points of view expressed in a discussion / debate
- read poems effectively (with proper rhythm and intonation)
- to transcode information from a graph / chart to a description / report and write a dialogue, short story or report.

Language Items

In addition to consolidating the grammatical items practiced earlier, the courses at secondary level seek to reinforce the following explicitly:

- sequence of tenses
- reported speech in extended texts
- modal auxiliaries (those not covered at upper primary)
- non-finites (infinitives, gerunds, participles)
- conditional clauses
- complex and compound sentences
- phrasal verbs and prepositional phrases
- cohesive devices
- punctuation (semicolon, colon, dash, hyphen, parenthesis or use of brackets and exclamation mark)

Methods and Techniques

The methodology is based on a multi-skill, activity based, learner centred approach. Care is taken to fulfil the functional (communicative), literary (aesthetic) and cultural (sociological) needs of the learner. In this situation the teacher is the facilitator of learning, s(he) presents language items, contrives situations which motivates the child

to use English for the purposes of communication and expression. Aural-oral teaching and testing is an integral feature of the teaching-learning process. The electronic and print media could be used extensively. The evaluation procedure should be continuous and comprehensive. A few suggested activities are :

- Role playing
- Simulating real-to-life situations
- Dramatising and miming
- Problem solving and decision making
- Interpreting information given in tabular form and schedule
- Using newspaper clippings
- Borrowing situations from the world around the learners, from books and from other disciplines
- Using language games, riddles, puzzles and jokes
- Interpreting pictures / sketches / cartoons
- Debating and discussing
- Narrating and discussing stories, anecdotes, etc.
- Reciting poems
- Working in pairs and groups
- Using media inputs - computer, television, video cassettes, tapes, software packages.

Assessment in class IX and X

The English curriculum aims at the harmonious development of the four language skills, and thus of the learners' communicative capacity. Teaching/testing objectives have been set for each of these skills, indicating the level of achievement expected of the learners. However, although it is possible to assess these skills and sub-skills, it is not possible to test all of them through a formal, time-bound examination. It is, therefore, essential to measure the level of attainment in these skills through Formative assessment, in addition to the Summative assessment. The overall pattern of the two modes of assessment at Class IX and X is as follows:

The academic year will be divided into two assessment periods:

Summative I- from April - September - 20 % weightage

Formative I - 10 %

Formative II- 10%

Summative II - from October - March 40 % weightage

Formative III - 10%

Formative IV- 10%

Formative Assessment is a tool used by the teacher to continuously monitor student progress in a non-threatening, supportive environment. It involves regular descriptive feedback, a chance for the student to reflect on the performance, take advice and improve upon it. It involves students being an essential part of assessment from designing criteria to assessing self or peers. If used effectively it can improve student performance tremendously while raising the self esteem of the child and reducing the work load of the teacher.

Features of Formative Assessment

- is diagnostic and remedial
- makes the provision for effective feedback
- provides the platform for the active involvement of students in their own learning.
- enables teachers to adjust teaching to take account of the results of assessment
- recognizes the profound influence assessment has on the motivation and self-esteem of students, both of which are crucial influences on learning
- recognizes the need for students to be able to assess themselves and understand how to improve
- builds on students' prior knowledge and experience in designing what is taught.
- incorporates varied learning styles into deciding how and what to teach.
- encourages students to understand the criteria that will be used to judge their work
- offers an opportunity to students to improve their work after feedback,
- helps students to support their peers, and expect to be supported by them.

Formative Assessment is thus carried out during a course of instruction for providing continuous feedback to both the teachers and the learners for taking decisions regarding appropriate modifications in the transactional procedures and learning activities.

Continuous assessment refers to the assessment of student's achievement throughout the year, through a variety of activities field trips and visits outside the schools are also carried out within the school. Such activities may be formal or informal, but in order to assess listening and speaking skills, it is important that a large proportion of the marks allotted should be derived from informal procedures.

Conversation skills (Listening and Speaking)-Assessment in this area relates to the teaching/testing objectives for these two skills. In the skill-based approach to language learning, the importance of conversation skills cannot be underestimated.

At the end of each term, the teacher should be able to assess the level of each student's conversation skills, based on observation of their participation in the English classes. Whenever in the coursework the students are required to discuss role play, simulate, express a point of view etc., the teacher should monitor the activities and critically observe each student's participation. It is important to stress that informal assessment for conversation skills should be a regular, ongoing activity throughout the term. A Conversation Skill Assessment Scale is given below. For each skill, students may be awarded marks from 0 to 10, but specifications are given only for bands 1,3,5,7 and 9. Using this scale, a teacher can place a student at a particular band; for example, a student falling between bands 3 and 5 would be awarded 4 marks, and particularly deserving students could be awarded 10 marks. Students should be informed at the beginning of the year that their class participation will be assessed in this way.

Conversation Skills Assessment Scale

Listening

The Learner

- 1 shows general ability to understand words and phrases in a familiar context but cannot follow connected speech;
- 3 has ability to follow short connected utterances in a familiar context;
- 5 has ability to understand explicitly stated information in both familiar and unfamiliar contexts;
- 7 understands a range of longer spoken texts with reasonable accuracy, and is able to draw inferences;
- 9 shows ability to interpret complex discourse in terms of points of view; adapts listening strategies to suit different purposes

Speaking

The Learner

- 1 shows ability to use only isolated words and phrases but cannot operate at connected speech level;
- 3 in familiar situation, uses only short connected utterances with limited accuracy;
- 5 shows ability to use more complex utterances with some fluency in longer discourse; still makes some errors which impede communication;
- 7 organises and presents thoughts in a reasonably logical and fluent manner in unfamiliar situations; makes errors which do not interfere with communication;
- 9 can spontaneously adopt style, appropriate to purpose and audience; makes only negligible errors.

The overall assessment policy for Class IX seeks to measure the four skills. Speaking has been covered under conversation skills, and is clearly not assessable through a written assignment. Listening and reading, however, can be assessed in this way, through activities which lead to a written product such as notes, a table or a summary. This type of assessment however should not be a test of writing skills. Students should be awarded marks as objectively as possible according to the extent to which they have understood, whether through reading or through listening. They should not be penalised in such assignments for errors in punctuation, spelling or grammar?

Other assignments, however, will focus on writing skills and involve extended writing. This takes place through writing skills activities in the Main Course Book, and via certain activities in the Literature Reader. Assessment of written work forms an important and integral part of the overall assessment of the student's ability in the use of the English language. It is in this area very often that subjectivity creeps in and mars the judgment in evaluation because of a lack of clear-cut guidelines for the teachers.

In the new curriculum for English, each student's written work has to be assessed throughout the year in an informal manner. For this, it becomes essential to provide a rating scale to help teachers to make formative assessment objective and uniform. The assignments should vary each year. Throughout the year, the teacher should keep a record of marks awarded for assignments and activities carried out as part of formative assessment.

Reading Project

Inculcating good reading habits in children has always been a concern for all stakeholders in education. The purpose is to create independent thinking individuals with the ability to not only create their own knowledge but also critically interpret, analyse and evaluate it with objectivity and fairness. This will also help students in learning and acquiring better language skills.

Creating learners for the 21st century involves making them independent learners who can 'learn, unlearn and re-learn' and if our children are in the habit of reading they will learn to reinvent themselves and deal with the many challenges that lie ahead of them.

Reading is not merely decoding information or pronouncing words correctly, it is an interactive dialogue between the author and the reader in which the reader and author share their experiences and knowledge with each other which helps them to understand the text and impart meaning to the text other than what the author himself may have implied. Good readers are critical readers with an ability to arrive at a deeper understanding of not only the world presented in the book but also of the real world around them. They not only recall what they read but comprehend it too. Their critical reading and understanding of the text helps them create new understanding, solve problems, infer and make connections to other texts and experiences. Reading does not mean reading for leisure only but also for information, analysis and synthesis of knowledge. The child may be encouraged to read on topics as diverse as science and technology, politics and history. This will improve his/her critical thinking skills and also help in improving his/her concentration.

Reading any text should be done with the purpose of:-

14. reading silently at varying speeds depending on the purpose of reading;
15. adopting different strategies for different types of texts, both literary and non-literary;
16. recognising the organisation of a text;
17. identifying the main points of a text;
18. understanding relations between different parts of a text through lexical and grammatical cohesion devices;
19. anticipating and predicting what will come next.;
20. deducing the meaning of unfamiliar lexical items in a given context;
21. consulting a dictionary to obtain information on the meaning and use of lexical items;
22. analysing, interpreting, inferring (and evaluating) the ideas in the text;
23. selecting and extracting from text information required for a specific purpose;
24. retrieving and synthesising information from a range of reference material using study skills such as skimming and scanning;
25. interpreting texts by relating them to other material on the same theme (and to their own experience and knowledge); and
26. reading extensively on their own for pleasure;

A good reader is most often an independent learner and consequently an independent thinker capable of taking his/her own decisions in life rationally. Such a learner will most assuredly also be capable of critical thinking.

Reading a book should lead to creative and individual response to the author's ideas presented in the book in the form of:-

- short review
 - dramatisation of the story
 - commentary on the characters
 - critical evaluation of the plot, story line and characters
 - comparing and contrasting the characters within the story and with other characters in stories by the same author or by the other authors
 - extrapolating about the story's ending or life of characters after the story ends
 - defending characters' actions in the story.
 - making an audio story out of the novel/text to be read out to younger children.
 - Interacting with the author
 - Holding a literature fest where various characters interact with each other
 - Acting like authors/poets/dramatists, to defend their works and characters.
 - Symposiums and seminars for introducing a book, an author, or a theme
 - Finding similar text in other languages, native or otherwise and looking at differences and similarities.
 - Creating graphic novels out of novels/short stories read
 - Dramatising incidents from a novel or a story
 - Creating their own stories
4. A Reading Project of 10 marks has been introduced in class IX & X.
 5. Schools may use books of their own choice.
 6. Schools can vary the level but at least one book per term is to be read by every child.

Teachers may opt for:-

- One book;
- Books by one author; or
- Books of one genre; to be read by the whole class.

Teacher may select books suitable to the age and level of the learners. Care ought to be taken to choose books that are appropriate in terms of language, theme and content and which do not hurt the sensibilities of any child.

Teachers may later suggest books from other languages but dealing with the same themes as an extended activity.

The Project should lead to independent learning/ reading skills and hence the chosen book/selection should not be taught in class, but may be introduced through activities and be left for the students to read at their own pace. Teachers may, however, choose to assess a child's progress or success in reading the book by asking for verbal or written progress reports, looking at the diary entries of students, engaging in a discussion about the book, giving a short quiz or a worksheet about the book/ short story. The mode of intermittent assessment may be decided by the teacher as she/he sees fit.

These may be used for Formative Assessment (F1, F2, F3 and F4) only. Various modes of assessment such as conducting Reviews, Discussions, Open Houses, Exchanges, Interact with the Author, writing scripts for plays can be considered.

(iv) Use scale of assessment for conversation skills for testing the students for continuous Assessment.

Besides measuring attainment, tests serve the dual purpose of diagnosing mistakes and areas of non-learning. To make evaluation a true index of learners' attainment, each language ability is to be tested through a judicious mixture of different types of questions. In addition to the summative tests, formative assessment is essential to measure the level of attainment in the four language skills and the learners' communicative capability. Formative assessment should be done through 'in class' activities throughout the year.

Besides measuring attainment, tests serve the dual purpose of diagnosing mistakes and areas of non-learning. To make evaluation a true index of learners' attainment, each language ability is to be tested through a judicious mixture of different types of questions. In addition to the summative tests, formative assessment is essential to measure the level of attainment in the four language skills and the learners' communicative capability. Formative assessment should be done through 'in class' activities throughout the year.

3. MATHEMATICS

(CODE NO. 041)

The Syllabus in the subject of Mathematics has undergone changes from time to time in accordance with growth of the subject and emerging needs of the society. The present revised syllabus has been designed in accordance with National Curriculum Framework 2005 and as per guidelines given in Focus Group on Teaching of Mathematics which is to meet the emerging needs of all categories of students. Motivating the topics from real life problems and other subject areas, greater emphasis has been laid on applications of various concepts.

The curriculum at Secondary stage primarily aims at enhancing the capacity of students to employ Mathematics in solving day-to-day life problems and studying the subject as a separate discipline. It is expected that students should acquire the ability to solve problems using algebraic methods and apply the knowledge of simple trigonometry to solve problems of heights and distances. Carrying out experiments with numbers and forms of geometry, framing hypothesis and verifying these with further observations form inherent part of Mathematics learning at this stage. The proposed curriculum includes the study of number system, algebra, geometry, trigonometry, mensuration, statistics, graphs and coordinate geometry etc.

The teaching of Mathematics should be imparted through activities which may involve the use of concrete materials, models, patterns, charts, pictures posters, games, puzzles and experiments.

OBJECTIVES

The broad objectives of teaching of Mathematics at secondary stage are to help the learners to:

- consolidate the Mathematical knowledge and skills acquired at the upper primary stage;
- acquire knowledge and understanding, particularly by way of motivation and visualization, of basic concepts, terms, principles and symbols and underlying processes and skills.
- develop mastery of basic algebraic skills;
- develop drawing skills;
- feel the flow of reasons while proving a result or solving a problem.
- apply the knowledge and skills acquired to solve problems and wherever possible, by more than one method.
- to develop positive ability to think, analyze and articulate logically;
- to develop awareness of the need for national integration, protection of environment, observance of small family norms, removal of social barriers, elimination of sex biases;
- to develop necessary skills to work with modern technological devices such as calculators, computers etc;

- to develop interest in Mathematics as a problem-solving tool in various fields for its beautiful structures and patterns, etc;
- to develop reverence and respect towards great Mathematicians for their contributions to the field of Mathematics.
- to develop interest in the subject by participating in related competitions.
- to acquaint students with different aspects of mathematics used in daily life.
- to develop an interest in students to study mathematics as a discipline.

4. SCIENCE

(Code No. 086 / 090)

The subject of Science plays an important role in developing in children well-defined abilities in cognitive, affective and psychomotor domains. It augments the spirit of enquiry, creativity, objectivity and aesthetic sensibility.

Whereas the upper primary stage demands that plentiful opportunities should be provided to the students to engage them with the processes of science like observing, recording observations, drawing, tabulation, plotting graphs etc., the secondary stage expects abstraction and quantitative reasoning to occupy a more central place in the teaching and learning of Science. Thus, the idea of atoms and molecules being the building blocks of matter makes its appearance, as does Newton's law of Gravitation.

The present syllabus has been designed around six broad themes viz. Food, Materials, The World of The Living, How Things Work, Moving Things, People and Ideas, Natural Phenomenon and Natural Resources. Special care has been taken to avoid temptation of adding too many concepts than can be comfortably learnt in the given time frame. No attempt has been made to be comprehensive.

At this stage, while science is still a common subject, the disciplines of Physics, Chemistry and Biology begin to emerge. The students should be exposed to experiences as well as modes of reasoning that are typical of the subject.

5. SOCIAL SCIENCE

CODE NO. 087

RATIONALE

Social Science is a compulsory subject upto secondary stage of school education. It is an integral component of general education because it helps the learners in understanding the environment in its totality and developing a broader perspective and an empirical, reasonable and humane outlook. This is of crucial importance because it helps them grow into well-informed and responsible citizens with necessary attributes and skills for being able to participate and contribute effectively in the process of development and nation-building.

The social science curriculum draws its content mainly from geography, history, political science and economics. Some elements of sociology and commerce are also included. Together they provide a comprehensive view of society-over space and time, and in relation to each other. Each subject's distinct methods of enquiry help the learners understand society from different angles and form a holistic view.

OBJECTIVES

The main objectives of this syllabus are :

- to develop an understanding of the processes of change and development-both in terms of time and space, through which human societies have evolved.
- to make learners realise that the process of change is continuous and any event or phenomenon or issue cannot be viewed in isolation but in a wider context of time and space.
- to develop an understanding of contemporary India with its historical perspective, of the basic framework of the goals and policies of national development in independent India, and of the process of change with appropriate connections to world development.
- to deepen knowledge about and understanding of India's freedom struggle and of the values and ideals that it represented, and to develop an appreciation of the contributions made by people of all sections and regions of the country.
- to help learners understand and cherish the values enshrined in the Indian Constitution and to prepare them for their roles and responsibilities as effective citizens of a democratic society.
- to deepen the knowledge and understanding of India's environment in its totality, their interactive processes and effects on the future quality of people's lives
- to facilitate the learners to understand and appreciate the diversity in the land and people of the country with its underlying unity.
- to develop an appreciation of the richness and variety of India's heritage-both natural and cultural and the need for its preservation.
- to promote an understanding of the issues and challenges of contemporary India-environmental, economic and social, as part of the development process.
- to help pupils acquire knowledge, skills and understanding to face the challenges of contemporary society as individuals and groups and learn the art of living a confident and stress-free life as well as participating effectively in the community
- to develop scientific temper by promoting the spirit of enquiry and following a rational and objective approach in analysing and evaluating data and information as well as views and interpretations
- to develop academic and social skills such as critical thinking, communicating effectively both in visual and verbal forms- cooperating with others, taking initiatives and providing leadership in solving others' problems
- to develop qualities clustered around the personal, social, moral, national and spiritual values that make a person humane and socially effective.

 - To facilitate the students in making choice of vocational courses at the higher secondary level.
 - To prepare students for participation in work-experience as a desired dimension of academic education and;

9. WORK EDUCATION

RATIONALE

In the new curriculum framework (2000) work experience has been termed as work education and thus makes it an integral component of education. As such it would provide both knowledge and skills through well-structured and graded programmes, which would help them on their entry into the world of work. Work education is a distinct curricular area for providing children with opportunities for participation of social and economic activities inside and outside the classroom, which would enable them to understand scientific principles and procedures involved in different types of work. The productive manual work situations were to be drawn from the area of health and hygiene, food, shelter, clothing, recreation and community service. The competencies to be developed in this field should include knowledge, understanding, practical skills and values through need based life activities. Pre-vocational courses should get a prominent place at this stage.

Work education aims at restoring dignity and respect to all types of manual work, promoting self-reliance in meeting one's daily needs and those of one's family and community, increasing productivity through the development of proper work skills and values, and promoting commitment to the welfare of the society through suitable programme of social work or community service.

Objectives

The major objectives of work education at the Secondary stages are:

- To help the pupils to develop essential knowledge and understanding in terms of :
 - identifying needs of the self, family and community in respect of food, health and hygiene, clothing, shelter, recreation and social service.

Course Content

The content of work education comprises two parts i.e. 'Essential Activities' for the satisfaction of day-to day needs of the pupils, their families and communities and an Elective Programme of productive work and services, which would result in some remuneration in cash or kind. The component of productive work practice through 'Elective Activities' is most important at this stage and is, therefore, to be assigned a weightage of 70 percent of the school time-table. However, the actual selection of activities/projects/prevocational courses by school would depend upon the availability of natural, physical and human resources in the locality, the socio-economic background of the community and the needs and interests of the pupils.

Essential Activities

List of activities for the secondary School stage is given below :

Intensive projects/prevocational courses in diverse need and occupational areas, to be pursued over a span of time ranging from a few months to the entire two-years duration of the Secondary stage, are clearly the answer for this requirement. Such projects/prevocational courses are intended to lead to intensive skill formation and proficiency in work which would be conducive to increased productivity and capacity on the part of pupils to engage in work which enables them to earn while they learn. This emphasis on intensive skill formation is meant to provide a prevocational base to the work education programme at this stage and also to serve as ground preparation for the world for those pupils who terminate their studies after Class X. For those who continue their education at the higher Secondary Stage, these prevocational courses will serve as preparation for vocational courses at the +2 stage. A tentative list of such projects/prevocational courses is given below.

Syllabus Outlines of Some Activities.

In order to enable the translation of the above activities and projects into concrete action and to ensure proper utilization of the allotted time as also optimum attainment of the intended objectives, some of the Essential and Elective Activities have been specified further. For Essential Activities, the number of periods needed for their performance, the class for which they are suitable and tools and materials required, are indicated. In case of Elective Activities, class wise prevocational courses are presented with details content/ major activities, learning outcomes/specific activities, teaching/learning methods, tools and materials, time required for performance and linkage with other curricular areas. Specific activities for the remaining activities/projects/prevocational courses can be worked out in similar manner. Syllabus outlines of some activities are given below.

Essential Activities

Activity 2 : Participating in the community health programme through door-to-door contact programmes.

Classess IX or X

Period 30

Malnutrition and infection are the major causes of the precarious status of health in the developing world. Malnutrition is not only due to poverty or non availability of food resulting from social and distributive injustice, but also due to ignorance of nutritional facts and undesirable practices. Malnutrition problems can be resolved to a great extent if judicious selection of food is made possible within economic means and the available foods are better utilized. Infectious diseases are caused mainly by the lingering existence of two fundamental problems of environmental sanitation, mainly unsafe water supply and unhygienic disposal of waste, specially human excreta. The application of modern scientific knowledge to environmental sanitation can lead to 80 percent of the diseases being effectively controlled.

Thus, by developing desirable nutrition, health and environmental sanitation practices in the communities, health problems can be considerably resolved. This can be achieved through environment based education for all age groups of population. A door to door contact programme is the most effective way of environment based education. Without any nutrition, health and sanitation intervention, the status of nutrition, health and sanitation in the community can be enhanced through functional education by door to door contact.

10. ART EDUCATION

RATIONALE

Art education constitutes an important area of curricular activity for the development of the wholesome personality of the learners. Art is a process of fulfilment running through every aspect of life and it goes on in a creative, productive and joyful manner. Art education helps to explore various means of communication (verbal and non-verbal). It encourages to develop creative expression and sharpens senses through keen observation of the environment. It helps to discover preferences through exposition to variety of material and identify the personal form and style of expression. It develops awareness of various art forms in and around the environment and locality and develops skills in the use of various tools, instruments and other art materials in the process of experimentation and exploration. In the process of discovering space, organization, colours, forms, lines, texture, movement, sound etc., learners develop a sense of organization and a sense of design which inculcates in them a sense of order with regard to their personal appearance, home, school and community. It also develops aesthetic sensibilities and respect for social values and cultural heritage.

The idea of creative art involves all the elements of commonly known art forms-visual, performing and language arts, namely music, dance, drama, drawing and painting, modelling and sculpture, or construction work, pottery and ceramic work, poetry and creative writing and other art-

connected craft forms.

OBJECTIVES

The objectives of art education are to :

- help the student to consolidate past experiences and knowledge;
- introduce the student to new media and techniques and their use for creative expression and for making objects of common use;
- provide opportunities for the development of awareness about folk arts, local specific arts and other cultural components leading to an awareness and appreciation of national heritage;
- help the student to use artistic and aesthetic sensibility in day-to-day life situation;
- help the student to achieve a balanced growth as a social being in tune with our culture through projects on natural and cultural heritage etc;
- get acquainted with the life and work of the local artists/artistes;
- develop creative expression through locally available material with the help of the community;
- refine the sense of appreciation of the beauty of nature and the basic elements of art forms;

APPROACH TO ART ACTIVITIES

At the secondary stage, art education is closer to the local folk art and craft and folk theatre. Art is not only to always blindly copy the old masters or copying the teacher's work in a rigid manner but to help learners express themselves in creative and imaginative ways. Creative arts cannot be a substitute of Work Education under which a few artistic activities may be conducted but the approach and product would be different.

In the interest of the learner, as far as possible, all the media of creative arts may be placed before the students for their choice of selection in one form of art or in a combination of art forms. These are :

VISUAL ARTS

- Two-dimensional or Pictorial
 - Drawing and Painting
 - Collage Making
 - Printing Making
 - Photography
 - Computer graphics (Wherever possible)
- Three-dimensional
 - Clay modelling and pottery
 - Carving and sculpture
 - Construction

PERFORMING ARTS

- Music (Vocal, Instrumental)
- Movement and Dance
- Creative Drama and Puppetry
- Creative Writing and Poetry

SOURCES FOR ART TEACHING

The arts programme in schools must reflect the ethos of the region. Artistic expression in music, poetry, dance theatre and in the creation of forms have been part of human life from the very beginning. It is not something new and strange - it is an integral part of human existence. Exposure to the local environment and arts in an essential activity of the school art programme.

Besides individual expression, the arts provide an opportunity to study and appreciate the contributions made in the past and present. By learning to appreciate music, painting, dance and theatre, one develops aesthetic sensibility and sensitivity to a better understanding of people belonging to other cultures. We can build a harmonious society, a productive nation or world itself with a deep sense of appreciation. For this, it would be necessary that the arts programme in school makes the child familiar with the tradition of arts of the region. From the strength and confidence gained from the familiar, it will be possible for him/her to respect and appreciate the culture and contribution made by others.

It is not always the sophisticated materials and expertise resources which matter for some sort of creative programme in schools—it is the understanding of the approach to the creative arts (for which the skills develop automatically) and the satisfaction of working and playing with children are of utmost importance. Locally available material can be used for creative expression. Help of the experts from the community can be taken.

11. PHYSICAL AND HEALTH EDUCATION

RATIONALE

Health and Physical education is concerned with total health of the learner and the community. Besides physical health, it includes mental and emotional health of the learners. WHO defines health as a state of physical, mental and social well-being and not merely the absence of disease or infirmity. The aim of Health and Physical Education is to enable the student to attain such a state of health that, it becomes an education for the total human being.

In this respect, it is a truism to say that the practice of healthy living will serve as the foundation for physical education. It is envisaged that any effort to promote aesthetic values at the school level will include a natural esteem for physical well-being. The mastery of the body, its powers and qualities, requires knowledge, methodical training and exercise. The skills and capacities developed, the muscles and nerves trained, the senses cultivated and hygienic and proper dietary habits inculcated. Therefore, provision has to be made much more systematically than before, in the school curriculum for Health and Physical Education. At the Secondary level acquisition of the habits of healthy living and participation in games and sports and athletics for the neuro muscular coordination and physical fitness are the aims which should be taken care of while developing any syllabus of health and physical education.

The objectives of Physical and Health Education are :

- to develop awareness of HIV, AIDS and drug abuse in the community;
- to develop an awareness regarding the importance of physical fitness and organic efficiency in individual and social life;
- to develop awareness regarding transfer of fundamental processes to physical activities of one's choice;
- to develop interest in exercise, sports and games for self-satisfaction and making it a part of life;

- to enable an individual to enhance inner qualities - as self-mastery, discipline, courage, confidence and efficiency;
- to enable an individual to display a sense of responsibility, patriotism, self-sacrifice and service to the community in a better way;
- to develop awareness of the importance of self-defense and self-dependence;
- to develop awareness of good posture so that one may strive to maintain a good posture;
- to enable an individual to lead an enthusiastic and active life;
